NATIONAL TRAINERS: CHUCK GEE AND JOE THOMAS

“They are clear, knowledgeable, ready for questions...really the finest trainers I’ve had.”
VCERTT’S FAVORITE TRAINERS, FROM WEBER STATE COLLEGE’S AUTOMOTIVE CENTER IN UTAH OFFER THREE CLASSES:

MISFIRE DIAGNOSIS AND REPAIR

WEDNESDAY 10/17 10:00 – 2:00, LUNCH INCLUDED FOR JUST \$25.00!

Chuck Gee and Joe Thomas will explain current misfire monitoring strategies, DTC and scan data information. They will, as always, provide effective and efficient techniques for diagnosis and repair of common and unusual sources of misfire and their DTCs.

O2S & AFRS & CATALYTIC CONVERTERS

WEDNESDAY 10/17 5:30 – 10:00, DINNER INCLUDED FOR ONLY \$25.00

OBDII OXYGEN SENSORS, AIR FUEL RATIO SENSORS, AND CATALYTIC CONVERTERS: OPERATION, DIAGNOSIS AND REPAIR

This course covers the different types of Oxygen Sensors (O2S) in use including the Critical Current and Ion Pump Air/Fuel Ratio Sensors. OBD regulations and vehicle OEM monitoring strategies for each type of O2S and Catalytic Converters are detailed along with diagnostic and repair verification procedures.

OBD II ELECTRICAL & ELECTRONIC SYSTEMS TESTING & DIAGNOSIS

THURSDAY 10/18 4:30 – 10:00, A TREAT AT \$25.00 FOR CLASS AND DINNER

OBDII VEHICLE EMISSION CONTROL SYSTEMS: ELECTRICAL & ELECTRONIC OPERATION, DIAGNOSIS AND REPAIR

This course covers basic and advanced electrical and electronic circuit theory of operation, input signal and output control Frequency Modulation (FM) and Pulse Width Modulation (PWM) with emphasis on emission control systems and devices to enhance the diagnostic process of vehicles that have failed an OBD II inspection or proper drivability performance. The teaching will increase diagnostic and repair effectiveness.
